Corporate Philosophy

Darshana Industries partners with clients to create solutions that foster productivity, performance and profitability. Adhering to the highest ethical standards and driven by a single-minded pursuit of excellence, we aspire to exceed customer expectations.

Engineered with passion

Darshana Industries is a firmly established name in the area of Plastic, Zinc moulded and Steel components.

Since its inception in 1982, Darshana Industries has consistently strived to cut through the clutter with its penchant for superlative quality. Today, we are an ISO 9001-2008 organization proudly serving a growing clientele in India and overseas.

True to our motto “Outline your needs; we will do the rest”, we offer a delightful turnkey experience to clients. With in-house facilities for R&D, Design, Prototyping, Manufacturing and Testing, we provide one-stop solutions that maximize convenience and minimize lead time.

Innovation is the bedrock on which our business is built; our design and manufacturing setup is optimized for great versatility. From concept to design, scaling methods and production, we have the ability to offer tailor-made products that match your precise needs.

Plastic Moulding, Zinc Alloy Pressure Die-Casting, Rubber Moulding Conveyorized Powder Coating and Metal Punching are some of the several processes housed in our modern facility located in Pune.

At Darshana Industries, quality is a mindset – it begins and ends with every individual employee. Implementation of the best quality practices indeed enables us to achieve better cost control with faster turnaround.

Darshana Industries caters to verticals across the board with its extensive product portfolio. We serve a niche OEM market; we are an exporter of Plastic, Zinc Moulded and Steel components for Control Panels to various countries like Canada, Middle East, South East Asia, Australia, UK and the USA.

Our custom-designed, high precision products are finding growing acceptance in diverse application areas including electrical control panels, machine tools, pharma & biomedical equipment, food processing units and printing machinery, among others.

Infrastructure

In-house processes, In-depth solutions from the drawing board to the dispatch area, we have a wide range of highly automated processes under one roof.

Using hi-end software, our Design & Development department successfully takes up R&D and tooling of diverse products.

Presently we have 110 registered patents, with 8 more in the pipeline.

We indeed feel proud of our first overseas patent in Germany for clip Hinges.

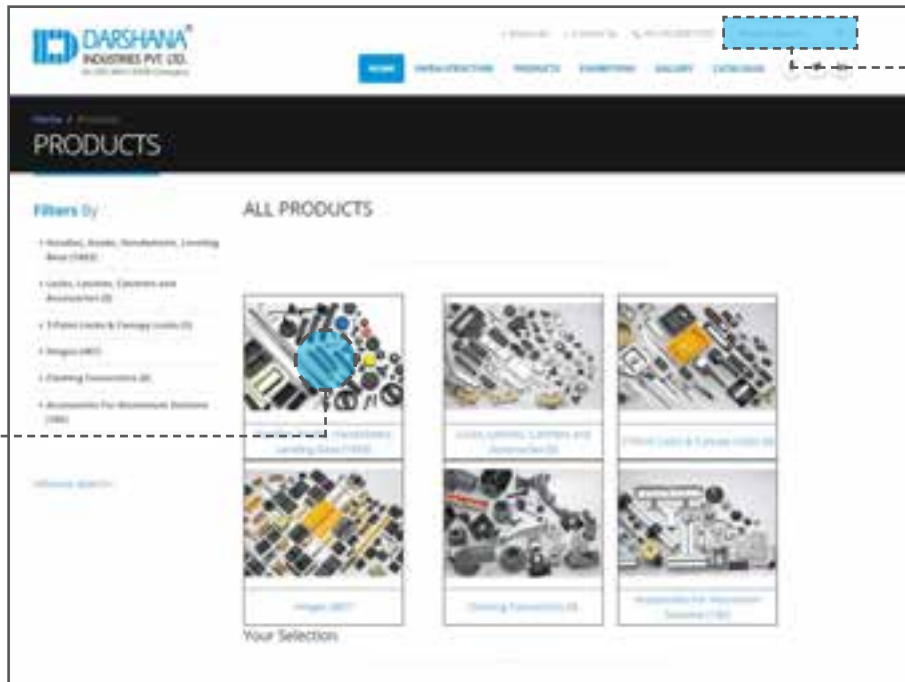

Robotically operated Plastic Moulding, Pressure Die Casting with weight sensing, fully conveyORIZED Powder Coating with custom shades ability, sophisticated Sheet Metal processing and Assembly departments for Locks, Handles & Hinges are some of the many facilities available in-house.

Our Functional Load Analysis Machine offers detailed load bearing data, while the Laser Marking equipment is a great way to emboss your logo on the product.

Real-time process monitoring through a fully integrated online ERP system ensures stringent QC at each stage and every station.

Last, but certainly not the least, is our user friendly CRM that greatly facilitates order placement for our valued customers.
